Download True CD Quality Music Now

Krystal Clear has teamed up with a new music download service-Music Giants. Its mission is to provide premium entertainment for high performance audio/video systems. Presently, they are the only licensee of the right to download the entire digital catalogs of all of the major labels (Sony/BMG, Warner Music Group, EMI, and Universal Music Group)

in true CD quality (i.e. using the Windows Media Audio Lossless ("WMA-L") codec to encode and deliver your favorite music.

Additionally, Music Giants will soon launch the sale of better than CD quality music from the majors and quality minded independent labels. With the cooperation of the copyright owners, they have lovingly

remastered, or are in the process of remastering, several hundred SACD and DVD-A titles of high resolution (24 bit/88.2 – 192 kHz) recordings into WMA-HD Video to follow.

Register Now for Your Christmas Gifts

It's starting to look a little like Christmas.. And what better time to introduce you to our wish list and gift registry. If you love high performance music, cinema, lighting, whole house distribution, satellite, and home control systems or would prefer to create and perhaps enhance your electronic lifestyle, registering is both easy and delightful.

Not only can you add your wish list items to our on-line form, but send them to friends and family members. Hint...hint.

So take advantage of our effortless way to get the message across to your gift-challenged givers this holiday season. Just go to: <http://www.kcaudio.com/registry.html>

Almost Famous

“We are a 23 year overnight sensation”, says Don Krasen-President KCAV.”

For over 23 years, Krystal Clear has deservedly established a reputation as the premier true high performance/high end electronics destination in the Dallas/Fort Worth area.

Recently, it seems others are taking real notice. From being featured in *the Dallas Business Journal* to a

prominent future story in the *Robb Report Home Entertainment* magazine, Krystal Clear is receiving acclaim for what makes them the go-to source for those discriminating clients who want the best in the Dallas/Fort Worth area (and beyond). Here's a list of recent and future articles: *The Dallas Business*

What's New ? Look what's here - Audio Physics Avanti 5 Loudspeakers

Something you have always come to expect from Krystal Clear is the arrival of new goodies. And let me tell you there is no shortage.

How about several new speakers from the entry level to approaching the ultimate. **Audio Physics**, hot on the trail of fantastic reviews, has introduced a new model in its fourth generation of successful models.

The model is called the Avanti 5. Avanti means “forward”: The AVANTI V has gone into production with a completely new cabinet design, new drivers and crossovers while at the same time remaining true to the three-and-a-half way system with four side-firing 7" woofers. In other words, the aesthetics and a wife-pleasing slim

cabinet design with sonics which go well beyond its \$14,999/pr. price. If you're the market for fidelity that has no equal in or even 1.5 times above this range, then come for an audition. Check out the site in the meantime:

Hansen Audio Lays Claim to the Best

It's good to be the King (or the Prince in this case). With such regal names in their line, Hansen Audio is the newest kid on the block, the next heir apparent to the world's greatest loudspeakers. I heard them at the Winter CES2006, and have been shaking my head ever since. With their female-designed curves, custom-built drivers (which feel like lead in your hands), stealth cabinet construction, to the real Mercedes finish (actually

finished at the Mercedes factory), Hansen Audio is poised to become the next top ultra high end audiophile speaker line. I think Harry Pearson (the renowned "HP" Of *Absolute Sound*) put it succinctly the other day while I was on the phone with him, "The Hansen **King's** are the best moving-coil dynamic speakers I have ever heard!" I couldn't agree more. In fact, HP was so enamored; he has decided to make the **Kings** his next

reference. High praise, indeed! It's high time for a new KING. By the way, we have the **Princes** on demo for your pleasure. They quite betray their royal heritage. You should really come in and pay your respects... More info:

By God It's Quad ...Again!

Few loudspeakers have arrived here with as much anticipation as the Quad electrostatics. A design that goes back almost 50 years, it represented as much of a genuine breakthrough then as it does now. A classic design, the new **Quad 2805/2905s** utilize thin mylar membrane panels to reproduce all lows, mids, and highs in a recording, all without a crossover. Some people feel this is not only the purest way to recreate music, but the very best

extant. Why don't you be the judge? Come in and hear them with the exquisite Italian Pathos InPol Squared integrated amp. You might find you very well agree.

In a recent review in HI Fi News October 2006, Ken Kessler states, "As of now, though, the **Quad ES-L2905** is the most seamless, focused, transparent speaker I have ever heard..It is to the original what a 2006 Ferrari 599 is to a 1953 250MM, updated in every important way."

"I know of no other speaker I'd rather own, regardless of price." - Sam Tellig *Stereophile, July 2006*
